

STRETCHER TROLLEY

Our primary objective is your **satisfaction**. Our **requirements** are as exacting as we would expect as a customer.

By supporting you from defining the product and throughout its life, we guarantee **high-performance** products, and a **responsive** and **high-quality service**.

We try, with humility, to **understand** your **use**, your **constraints** and to redefine the circuit of your patients to **improve** your **working conditions** and the **efficiency** of your **organization**.

We base our relationships on **shared trust**, making it our priority to be by your side for the **long term**.

UNDERSTAND YOUR USE, YOUR CONSTRAINTS

Bi-lateral variable height

Its high-quality hydraulic columns can withstand over 30,000 cycles. Its long lever arm reduces pushing effort: real comfort for staff.

Hygienic mattress

Velcro-free, cleaning the mattress and hard surface is easy. The cover is resistant to decontaminants and the zipper is protected from liquids. From 8 to 15 cm (3 to 6 inches), it offers the patients comfort, even over a long period.

Retractable handles

Their ergonomic shape make pushing easy and comfortable. Made from ultra-resistant plastic, they don't rust.

Resistant barriers

Equipped with two rotation axes, they are 10 times more resistant than the standard. The side button positioned on the foot side is easily positioned for staff while remaining inaccessible to patients. They can be retracted under the sleeping surface, making transfers easy.

Reinforced wheels

Each wheel supports a load of 220kg (485 lbs). The thick tire absorbs shocks and the rolling noise. They are waterproof as well as dust-proof. Compatible with all types of flooring, including tarmac.

Corner protections

Its shape was specially studied to absorb impacts. Highly resistant, the part can also be removed and recycled. Three colors are available to differentiate stretchers between departments.

5th directional wheel

Intuitive and easy to guide, the fifth wheel considerably reduces staff pushing efforts. Regardless of the weight, the stretcher is light and easy to handle.

Lowering, Trendelenburg and Reverse Trendelenburg positions

Positions are operated with the foot, on each side of the stretcher: easy to access, even with sterile, dirty or occupied hands. The pedals are placed ergonomically, at an easy height for each user.

M O B I L I T Y

Our stretchers have been designed to make your daily life easier

We understand that your time is precious. Each second counts. That is why our stretcher is so easy to use. Its fifth directional wheel makes it light and intuitive. Controlled by the same pedal as the other wheels, it can be set up without even having to think about it. Its reinforced wheels can adapt to any type of floor or obstacle. Its push bars perfectly fit the shape of your hands. Improving your working conditions is one of our priorities.

Guaranteeing the **safety** of your patients

Patient safety is not optional. The stability of our product is such that even when placed in the least favorable conditions, the stretcher does not tip over. In an emergency, the Trendelenburg or Reverse Trendelenburg or CPR (cardiopulmonary resuscitation) positions can be reached within seconds.

R E L I A B I L I T Y

High-quality components,
Long-term use,
A reduced environmental footprint

Our environmental awareness has led us towards an eco-friendly design. BMB MEDICAL is concerned about the ecological impact of its products at each stage of their life cycle. This commitment is reflected in actions in relation to packaging, the “4R” policy (reduce, replace, recycle, recover) and work on materials. Our products are designed in accordance with standard IEC60601-1-9, that defines the requirements for eco-friendly design.

Our products are tested on a testing bank with constraints that are significantly higher than those it will be subjected to in daily use. Our columns require no maintenance. Our sleeping surfaces are made from compact laminate, an extremely resistant and rot-proof material. Our corner protections are resistant to shocks and aging. Our barriers with two rotation axes are particularly robust. Choosing BMB MEDICAL is a guarantee of quality but also offers significant savings on your maintenance budget.

HEIGHT-ADJUSTABLE STRETCHER TROLLEY CAREO

CAREO is a patient trolley with height adjustment on hydraulic columns.

Easy to use and robust, CAREO is the perfect product for patient transportation.

Equipped with radio translucent material, adjustable back rest, Trendelenburg/Antitrendelenburg, CAREO is also suitable for emergency and operating rooms.

Comfortable

Adaptable many options available

Easy to use, variable height & trendelenburg

Versatile, adapted to different hospital services

CAREO DIMENSIONS

	LENGTH	WIDTH
OVERALL	201 cm	74 cm
VARIABLE HEIGHT	64 - 97 cm (including 8cm thick mattress)	

PRODUCT WEIGHT : 80 Kg
SAFE WORKING LOAD : 200 Kg

NON CONTRACTUAL PHOTOS - ACCESSORIZED PRODUCTS

Combining lightness, robustness and intuitiveness, our STRETCHER TROLLEY range is suitable for patient transfer, emergencies and recovery room. On request, many options allow a perfect match to your needs.

Height-adjustable trolley stretcher

- Removable mattress made of high quality and resilience foam (35kg/m³) - Height : 8 cm
- Trendelenburg / Anti-Trendelenburg +/-18°, hands free control
- Backrest adjustable by 2 gas springs (0 - 90°)
- Thermoformed ABS base
- 2 holders for IV pole head-end
- Bumpers on all 4 corners
- Castors Ø 200 mm with central steering and braking system foot-end
- 2 directional wheels head-end
- Drop-down side rails with 2 horizontal bars - Anodized aluminium.
- Fixed push bar foot-end
- Frame cover including O2 tank holder
- Removable cover - PVC coated Jersey - Colour : grey

2 holders for IV pole head-end
