

## TECHNICAL DATA SHEET

### REFRIGERATING FUNERAL TABLE Ref. 1000 (Width 62cm) or Ref. 1005 (Width 74cm)

Refrigerating table for the presentation of the body in the living room of the funeral or mortuary chamber, very silent (sound level 42 dB), stainless steel table 304 L 10/10° with ABS frame and 4 swivel wheels of  $\Phi$  75mm including 2 with brake, head part raised 22° and leg part foldable by hinge and locking for support on ABS base using a removable stainless steel U, contact temperature from -16°C to -12°C with insulation of the table by rigid polyurethane foam expanded without CFC thickness 38mm.

- **Size:** 2 widths, 62cm for normal body Ref.1000 and 74cm for large or heavy bodies Ref.1005.
- **Refrigerating Group:** Operated, hermetic compressor, fan on condenser, cooling capacity 220W at -18°C, adjustable power by graduated thermostat, gas R 134A in compliance with CFC regulations, refrigeration on the bust and head section, manual defrosting with condensate recovery in removable drawer tray, power supply 230V / 50Hz / 16A, IP66 protection (1.3m cable).
- **Packing:** individual, made of cardboard.
- **Maxi load capacity:** 230 Kg.
- **Cleaning:** water and soap, and any disinfectant product compatible with polyester cleaning.
- **Dimension:** length of the unfolded table 190cm (folded 120cm), apron height 57cm and head height 70cm,
  - Table width 62cm: weight 46 Kg,
  - Table width 74cm: weight 50 Kg,
- **Product benefits:**
  - Easy to use, easy to maintain and maintain,
  - Robust due to its base in thermoformed ABS reinforced in the corners, and well balanced,
  - Very efficient in cooling (setting to -12°C in less than 15 minutes) with a powerful compressor,
  - Small footprint and balanced weight on its 4 castors make the table very handy,
  - Low power consumption, and very quiet (42 dB).
