

ACCEL BIKE II

Sojadis

MULTIFUNCTION ACCELERATOR AND BRAKE HANDLE

The new ACCEL BIKE II is a real clustering of electronic technologies into one innovative, intuitive, all-in-one driving aid designed for drivers with restricted leg mobility. The ACCEL BIKE II aid combines manual acceleration and braking as well as a central control joystick.

Designed along the lines of a motorbike handle, ACCEL BIKE II can be mounted to the left or right of the steering wheel and is reliable, safe and ergonomic as well as being very easy to use and makes driving smooth and enjoyable.

- > I activate ACCEL BIKE II when starting the engine.
- > I turn the handle to accelerate.
- > I push the handle horizontally to brake.
- > I use thumb pressure on the joystick to activate or deactivate 7 possible controls, such as the lights, indicators and wipers.

ACCEL BIKE II

CATEGORY

Combined acceleration and brake system + additional controls

(FRENCH) DRIVER'S LICENCE CODES

32/35

INSTALLATION

> Installation on any vehicle with automatic transmission and an electronic accelerator pedal.

THE PLUSES
